-----END OF LISTING-----

NOTE 1: The procedures that have been accepted by the type certificate or TSO authorization holder and its cognizant FAA Aircraft Certification Office, for minor changes to original articles used on type-certificated products, are also acceptable for incorporating the same minor changes on identical PMA replacement articles. The PMA holder must be able to show traceability relating to the TC, STC, or TSO authorization holder on all minor changes incorporated by this procedure. When these procedures are no longer applicable because of the completion of the production contract, or termination of the licensing agreement or business relationship, all subsequent minor design changes to the PMA articles must be submitted in a manner as determined by the ACO. Major design changes (reference 14 CFR §§ Part 21.319 and 21.619) to drawings and specifications, are to be handled in the same manner as that for an original PMA.

Jill Miller
Aviation Safety Inspector, Seattle MIDO Section
System Oversight Division
Aircraft Certification Service
